Part One
An Overview of Business Ethics

Chapter 2
Stakeholder Relationships, Social Responsibility and Corporate Governance
Building effective relationships is one of the most important areas of business today

- Business ethics is a team sport and few decisions are made by only one individual

- **Stakeholder framework**
  - Helps identify internal and external stakeholders
  - Helps monitor and respond to needs, values, and expectations of stakeholder groups

- **Corporate governance**
  - The formal system of accountability and control of ethical and socially responsible behavior
Stakeholders Define Ethical Issues in Business

- **Stakeholders**: Those who have a stake or claim in some aspect of a company’s products, operations, markets, industry, and outcomes
  - Customers
  - Employees
  - Government agencies
  - Communities
  - Investors
  - Suppliers

- The relationship between companies and their stakeholders is a two-way street
Stakeholder Theory

- Three approaches to stakeholder theory
  - Normative
    - Principles and values help identify ethical guidelines that dictate how to treat stakeholders
  - Descriptive
    - Focuses on actual behavior, addressing decisions and strategies in stakeholder relationships
  - Instrumental
    - Examines stakeholder relationships and describes outcomes for particular behaviors
Identifying Stakeholders

- **Primary stakeholders**: those whose continued association is absolutely necessary for a firm’s survival
  - *Employees, customers, investors, governments, and communities*

- **Secondary stakeholders**: do not typically engage in transactions with the firm and are not essential to a firm’s survival
  - *Media, trade associations, and special interest groups*
The Stakeholder Interaction Model

A Stakeholder Orientation

- The degree to which a firm understands and addresses stakeholder demands
- Involves activities that facilitate and maintain value with stakeholders
  - Generation of data about stakeholder groups
  - Distribution of that information
  - Responsiveness of the organization as a whole
Social Responsibility

- An organization’s obligation to maximize its positive impact on stakeholders and minimize its negative impact

- Four levels of social responsibility
  - Economic
  - Legal
  - Ethical
  - Philanthropic
The Steps of Social Responsibility

Philanthropic: “giving back” to society

Ethical: following standards of acceptable behavior as judged by stakeholders

Legal: abiding by all laws and government regulations

Economic: maximizing stakeholder wealth and/or value

Source: Adapted from Archie B. Carroll, “The Pyramid of Corporate Social Responsibility: Toward the Moral Management of Organizational Stakeholders,” Business Horizons (July–August 1991): 42, Fig. 3.
Corporate Citizenship

- The extent to which businesses strategically meet their economic, legal, ethical, and philanthropic responsibilities

- Four interrelated dimensions
  - Strong sustained economic performance
  - Rigorous compliance
  - Ethical actions beyond what is legally required
  - Voluntary contributions to advance reputation and stakeholder commitment
The World’s Most Ethical Companies

Reputation

- **Reputation** is one of an organization’s greatest intangible assets with tangible value
  - Difficult to quantify but very important
  - A single negative incident can influence an organization’s image and reputation instantly and for years afterwards
Social Responsibility Issues

❖ Social
  ➢ *Deals with concerns that affect the welfare of our entire society, associated with the common good*

❖ Consumer Protection
  ➢ *The company has the responsibility of taking precautions to prevent consumer harm*

❖ Sustainability
  ➢ *Businesses can no longer afford to ignore the natural environment as a stakeholder*

❖ Corporate Governance
  ➢ *Research shows corporate governance has a strong positive relationship with social responsibility*
Social Responsibility and Stakeholder Orientation

- Caring about stakeholders can lead to increased profits
  - The purpose of a stakeholder orientation is to maximize positive outcomes that meet stakeholder’s needs
  - Stakeholders support companies they perceive to be socially responsible, enhancing profitability

Corporate Governance

- Formal systems of accountability, oversight, and control
  - **Accountability**
    - How closely workplace decisions align with a firm’s strategic direction
  - **Oversight**
    - A system of checks and balances to minimize opportunities for misconduct
  - **Control**
    - The process of auditing and improving organizational decisions and actions

<tr>
<td>Important characteristics in directors: strong financial background, industry background, and international experience</td>
</tr>
<tr>
<td>Average board member retainer: $20,000 in 1986 ($40,000 in today’s dollars) and $80,000 in 2010</td>
</tr>
<tr>
<td>Average total director compensation has risen to $215,000 in 2010</td>
</tr>
</tbody>
</table>

Views of Corporate Governance

- **Shareholder model**
  - *Founded in classic economic precepts*
  - *Maximizing wealth for investors and owners*

- **Stakeholder model**
  - *A broader view of the purpose of business*
  - *Includes satisfying concerns of primary stakeholders including employees, suppliers, regulators, communities and special interest groups*
Role of Board of Directors

- Holds final responsibility for its firm’s success, failure, and ethicality of actions
  - The global financial crisis motivated many to demand greater accountability from boards
  - In reality, boards rarely manage but instead monitor executive decisions
  - Executive compensation is a growing ethical concern
Demands for Accountability and Transparency

- Stakeholders demand that boards are accountable and transparent
  - Directors offer expertise, competence, and diverse perspectives to strategic decisions
  - Qualified, knowledgeable, diverse, unbiased boards can prevent misconduct
- Interlocking directorate is the concept of board members being linked to more than one company
Executive Compensation

- Many boards spend more time discussing compensation than ensuring integrity of financial reporting systems.
- How closely linked is executive compensation to company performance?
- Does performance-linked compensation encourage executives to focus on short-term performance at the expense of long-term growth?
Implementing a Stakeholder Perspective

1. Assessing the corporate culture
2. Identifying stakeholder groups
3. Identifying stakeholder issues
4. Assessing organizational commitment to social responsibility
5. Identifying resources and determining urgency
6. Gaining stakeholder feedback
